<b>Facility:</b>	10 Hospital stalls, 5,000 sf. hospital and adjacent 2,000 sf. office space and intern housing.		
<b>Caseload:</b>	Ambulatory, elective, arthroscopic & emergency surgery, lameness, sports medicine cases.		
<b>Caseload Breakdown:</b>	Ambulatory (40%), surgery (25%), lameness (30%), medicine and specialty (5%)		

Interns will develop professional and client communications skills through hands on experience with a predominately performance horse practice. A progressive approach to ambulatory & sports medicine, diagnostics, and equine emergency hospital care will help you achieve the expectations of this year-long internship. Responsibilities will include hospital duties, patient care/monitoring, client communications, anaesthesia, assisting in surgery, receiving and working up referrals as well as assisting staff doctors with lameness workups, prepurchase exams, ambulatory medicine and field emergencies. Interns share emergency duty and for the first 4-6 months are supervised by staff clinicians. When interns are judged as being ready to work on their own, selected emergencies will be given to them to manage.

Interns must be graduates of a US or US accredited vet school, possess a California license & have developed good equine and people skills. We highly encourage clinic visits or participation in our Externship program in order to gain a true picture of our practice and the people who work here.

Benefits include salary, housing, medical plan, professional liability and continuing education.
